Introduction

Compaq is proud to announce the new Compaq S7500 monitor, an economical 17-inch CRT that offers exceptional front-of-screen performance in an affordable carbon and silver cabinet. Ideally suited for use with common business applications such as word processing, presentations, and e-mail, the S7500 monitor is the perfect PC companion for mainstream business users.

What's Special about This Product?

Large screen size and most economical upgrade

The large 16-inch viewable screen of the S7500 monitor reduces user eyestrain and fatigue while improving production and work quality. The 17-inch monitor offers the most economical upgrade from a standard 15-inch monitor, without the increased bulk or cost of a 19-inch or 22-inch unit.

Exceptional front-of-screen performance

The S7500 monitor's image presentation features are comparable to larger and more expensive CRT models. The flicker-free display includes .28 mm trio dot pitch and 1280 x 1024 maximum resolutions for crisp, clear presentation of everyday business applications, Internet sites, and e-mail.

Ideal companion for Compaq PC

The S7500 monitor is a highly affordable CRT that can also be an integral part of a total desktop solution. It is specifically designed to match in color and style when combined with a Compaq Evo desktop or notebook PC and docking station. When you buy the S7500 monitor along with a Compaq PC, you are guaranteed end-to-end product serviceability and support from Compaq with just one phone call.

Ergonomic design

The S7500 monitor is designed for optimum user comfort. In addition to anti-glare and anti-static screen coatings that ease viewer eyestrain and fatigue, the monitor's tilt-and-swivel features let users adjust the positioning of the unit according to their individual needs.

Environmentally friendly

The S7500 monitor meets the most stringent worldwide environmental regulatory standards, including TCO99 (select models), which insures reduced emissions and compliance with environmental sourcing and recycling standards. The monitor also qualifies for Energy Star compliance and is MPR-II compliant to ensure lower emission levels.

User-friendly on-screen controls

The S7500 monitor features Plug and Play convenience for easy setup and maintenance. A wide range of icon-based on-screen controls allow users to quickly customize the display to match their preferences, without maneuvering a lot of buttons and switches. Settings are easily reset on-screen and then stored in memory so that the same settings apply each time the unit is turned on.

Backward and forward compatibility

Along with every monitor Compaq sells, the S7500 monitor is tested for backward and forward performance and functional compatibility with legacy, current, and in-development Compaq and third-party desktops, notebooks, workstations, and other products.

Color-management software

The S7500 monitor includes Coloreal™ color-management technology, for accurate color presentation from the Internet to your PC. With Coloreal, you're guaranteed rich, true color representation while shopping on the Web. When you buy both a Compaq monitor and PC equipped with Coloreal, you get perfect Internet color matching right out of the box.
